

## Maldon Museum & Archives Association

In 2015 the Maldon Museum and Archives Association realised a five year project to document, interpret and present the history of Maldon and District. The project included a reimagining of their exhibition space through a thematic interpretation strategy, improvements to the artefact cataloguing system, consolidation of records and resources and implementation of a range of digital technologies to enhance visitor experience and research capabilities. The innovative and forward thinking approach to the project will ensure that Maldon's history is more easily accessible to the community and will engage new visitors and reach new audiences.
